We've teamed-up three winners to bring you a complete and versatile way to start saving valuable time. Whether you're just starting out or an experienced word processor, this is the package for you.

Included in this special:
DataBiotics' *WordWriter* cartridge-based word processor (see page 7 for details) and Axiom's *Parallax-TI* Parallel Printer Interface for direct hookup of Sanyo's

PR3000 Daisy Wheel (letter quality) Printer to your TI-99/4A console.

This cartridge/interface/printer combination is great for students and others who are tired of using typewriters, where correcting mistakes and retyping becomes a big hassle and time-waster. Also, you can expect little or no maintenance expense on this system.

A cassette recorder (see page 4) is recommended if you wish to save, retrieve or modify documents at a later time.
